DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Drawings, Fig.3 has been labeled to show R, R424 and C410 as disclosed in the specification.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a flashlight lamp circuit with automatic light adjustment having, inter alia, a flashlight activation unit receiving a flashlight activation signal when the main capacitor is in a workable status, and executing flashlight activation according to the flashlight activation signal, and a flashlight control unit, receiving the second electric signal from the integral circuit, wherein the flashlight control unit extinguishes the flashlight lamp when an amount of light corresponding to the level of the second electric signal reaches a required light exposure (claim 1). The remaining claims 2-6 are allowed by virtue of their dependencies from the independent claim. Hence, the examiner has allowed claims 1 through 6 .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ikawa et al., Patent No. 4,153,355; Takematsu, Patent No. 4,469,989.

None of the above patents discloses the flashlight activation unit and the flashlight control unit as recited.
